Charotar University of Science and Technology, India
- BCA (Bachelor of Computer Applications)
July 2014 - July 2017

I achieved a 6.75 CGPA with good knowledge of practicals. Also, I got different viewpoints for achieving my future goal.

PROJECTS

WatchO & DCLeake
- Project under Consumer Sketch

April 2022 - Current

Both sites are using BigCommerce which is a NASDAQ-listed eCommerce platform that provides software as a service to retailers. The company's platform includes online store creation, search engine optimization, hosting, and marketing and security for small to enterprise businesses. WatchO & DCLeake are the online stores that the Client handles and we have to customization the theme and do some logic for custom functionalities. BigCommerce's theme is working with the Handlebar JS.

IgoWok
- Project under Consumer Sketch

February 2022 - April 2022

IgoWok is a site where you can advertise jobs and search for resumes. They are an integral part of almost every hiring process and using them effectively will translate into qualified candidates for relatively low costs. IgoWork is developing into ReactJS with Laravel API.

InCTRL - opsCTRL
- Project under BiztechCS

January 2020 - January 2022

Waste Management App Supplier and facility - inCTRL Solutions works hard to help you better understand, manage and optimize your technology and facility's performance. We are specialists in water, wastewater, and biogas.opsCTRL is a Connected Data, Asset, and Knowledge Management Solution built for facility operators.

PME & PA
- Project under BiztechCS

July 2019 - January 2020

Proofread My Essay is a UK-based company that offers quality proofreading services to students, professionals as well as business owners. Initially, the company used to work with students and offered a "Pay as you go" option. It recently came up with the "Pay upon invoice" option for businesses and organizations so that they can submit bulk work and documents for proofreading. BiztechCS developed the company's website cum web application with custom modules, payment gateway, and other integrations.

Personal Card Holder
- Personal Idea

Covid Period

In this project, I tried to manage all the personal documents with their images and passwords. I used the JSON and the master passwords in this project as authentication.

Counseling Management System
- Project of MCA
July 2018

In this project, We tried to manage the leaves & personal questions of students and make the whole counseling management system in an android application with Core PHP API. We managed the four types of user roles like Super Admin, Admin, Faculty, and Student.

Leave Management System
- Project of BCA
July 2016

This project provides information about leave to different users and also employees can view leave, take leave, and delete the leave.

ACHIEVEMENTS

- Served as a volunteer of NGO "NIRMAAN" which worked to educate poor children
- Served as a volunteer of CREDP (Charusat Rural Education Development Program)
- Completed the course "Programming in C"
- Senior volunteer of Tech. Fest
- Volunteer of EOC (Equal Opportunity Cell)

PARTICIPATION

- Participated in SIGHT-N-ERROR on Cognizance-2014 (Technical Festival) at CSPIT, CHARUSAT
- Attended Android Workshop on 13th -14th February 2015 at CMPICA, CHARUSAT
